Learning vocabulary: tips and techniques

Guessing meaning from context

When you meet an unknown word, first try to guess the meaning from the context – the surrounding words and the situation.

Read the text on the right and see how words have meaning in relation to other words.

- You know that a PC is a type of 'computer' and digital music relates to 'music on computers'.
- You can guess that are digitizing is a verb because it derives from 'digit', it is in the form of the present continuous, and it goes with the subject 'families' and the object 'home movies'.
- Words change their shape by adding prefixes and suffixes; for example, we add the prefix inter- to net and form Internet, and we add the suffix -age to store and form storage. (See Units 33 and 34.)

The birth of a revolution

Kids use PCs to do homework, access information via the Internet for research, communicate with pals, play video games and collect

digital music. Parents, too, use the PC for communication and entertainment but also let it handle mundane tasks like balancing the checkbook, monitoring investments, preparing tax returns, and tracking the family's genealogy. With the advent of more powerful PCs with greater storage capacity, families are digitizing home movies and photos are stored on the home computer.

B Organizing vocabulary

Read the text again. You can organize words in your notebook in different ways.

How? Examples definition The Internet is a global network of computers. Meaning lexical family digit (root), digital, digitally, digitize, digitizer, digitized synonyms handle = manage; advent = arrival translation storage = almacenamiento (Spanish) Word class (n), (v), (adj), etc. communication (n); communicate (v) Word prefixes Internet; research building suffixes information; investment; powerful BrE: chequebook compounds chequebook (cheque + book) AmE: checkbook

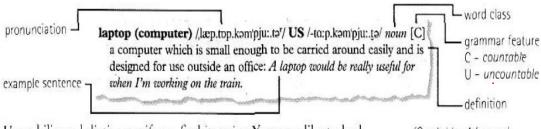

■ Collocations word partners, phrases access information; handle tasks

Word trees and spidergrams can help you build up your own mental maps of vocabulary areas. You can make diagrams to classify things.

C Using a dictionary

A monolingual dictionary gives you a lot of information about words. Look at this entry.

Use a bilingual dictionary if you find it easier. You may like to look at some Cambridge dictionaries at www.dictionary.cambridge.org. For ICT, you can also use an online computer dictionary.
