

PW 4 : HTML

Exercise 1

1. Open **Notepad**, copy the following text into it:

```
<html>
  <head>
    <title> My first page </title>
  </head>
  <body>
    <H1>Happy New Year</H1>
    The weather is <b>nice </b>. But what the good weather if it hadn't been for
    the <b> rain </b> previously ?
  </body>
</html>
```

2. Save the file as “ **test1.html** ” ?

3. Using a browser, open the file you just wrote

Exercise 2

Write an **html** code that will look like this:

“Hello, Happy New Year **2024**, good health and above all: Best wishes!

Give this file the title “**Happy New Year**”.

Save this file as “**test2.html**” and view it in your browser.”

Exercise 3

Open **notepad** and enter the following code:

```
<html>
  <head>
    <title> First try </title>
  </head>
  <body>
    <p>
      Hello everybody...
      <!-- I don't really know what to write so I make lots of comments which will not be
      displayed -->
    </p>
  </body>
</html>
```

1. Save the file as “test3.html”

2. Using a browser, open the file you just wrote.

Background color

Replace the <body> line with the following:

```
<body bgcolor="#00C0FF" text=red>  
<body background="image_name.gif">
```

Titles

Let's change the text of our page a little, to something like:

```
<h1 align=center>Here's a title</h1>
```

```
<h2>Now a subtitle</h2>
```

```
<h3>And we can continue</h3>
```

```
<h4>Depth is limited</h4>
```

```
<h5>Penultimate</h5>
```

```
<p align=right>A small right-justified text to introduce this part, she deserves it well, and then it would be a shame to deprive.
```

```
<h6>A really short paragraph</h6>
```

Exercise 4

Create an html page named **principal.html** which contains two links to the two pages previous ones (test1.html and test2.html).

Add a background image of your choice.

1. Link to an HTML file

```
<a href="destination/address.html">Link text</a>
```

Example :

In the body "body" of the main.html file add:

```
<a href="test1.html">Link text</a> <br>
```

```
<a href="test2.html">Link text</a>
```

2. Link to a site

```
<a href="http://www.google.com/">Google</a> the google site<br>
```

3. Add a background image <body background="arrplan.jpg" >

Exercise 5

Open the principal.html file. Add a link to the Google site and link to the encyclopedia Wikipedia. : <http://www.google.com/>

https://fr.wikipedia.org/wiki/Wikip%C3%A9dia:Accueil_principal)

Additional: Styles, Colors, Sizes, Fonts

 Text can be bold,

 <i>Italics emphasize the text!</i>

 <tt> And finally, we can write on the machine of the same name, </tt>

 <u> an underlined style to avoid: here, you cannot click,</u>

 <s> and you can even cross out text </s>

 <big> You can write large characters, </big> <small> or small

</small>

 And finally, we can use exponents as in 1^{er} or

indices, $u_{n+1} = u_n + 1$

 Purple text,

 text, larger text (relative),

 of text, absolute size,

 and pretty letters.
