

TP 03

- 1) Open a new Word document ,and insert the following diagram :

- 2) Modify the previous picture of diagram by Painter.
3) Insert header ,footer ,and number of the page, and footnote.
4) Write this text:

1-What is an operating system?

An operating system (OS) is the program that, after being initially loaded into the computer by a boot program, manages all of the other application programs in a computer. The application programs make use of the operating system by making requests for services through a defined application program interface ([API](#)).

2-Types of OS:

a-[Windows](#) is Microsoft's flagship operating system, the de facto standard for home and business computers. Introduced in 1985, the GUI-based OS has been released in many versions since then. The user-friendly Windows 95 was largely responsible for the rapid development of personal computing.

b-Mac OS is the operating system for Apple's Macintosh line of PCs and workstations.

c-[Unix](#) is a multiuser operating system designed for flexibility and adaptability. Originally developed in the 1970s, Unix was one of the first operating systems to be written in the [C language](#).

d-[Linux](#) is a Unix-like operating system that was designed to provide PC users a free or low-cost alternative. Linux has a reputation as an efficient and fast-performing system.
